

INPA Website

Content & Media Submission Checklist

Everything needed from the INPA team to replace development placeholders and complete the public website locally.

This document does not request a domain, Cloudflare account, GitHub deployment, payment details, or any other external service. Those belong to a later deployment phase.

Priority roadmap

Use this roadmap before the detailed checklist. Work from Priority 1 downward; Priority 2 and Priority 3 must not delay the first local website draft.

Status key: [x] available, [~] partly available, [] still needed.

Priority 1 - first local draft

Supply these items first. They determine the homepage identity, primary content, navigation and reviewability.

Priority 1 deliverable	Current status
Official name, tagline and registration facts	[x] Available from the supplied Nuclear Horizons issues
Official logo package, brand colours and permitted fonts	[] Needed now
Hero media, final headline/introduction and exact call-to-action destinations	[] Needed now; official tagline is available
President homepage package: portrait, credit, final short message and approval	[~] Name, affiliation and message summary available; media/approval pending
About INPA package: approved 80-150 word summary and final mission/vision wording	[~] History, objectives and registration facts available; final approval pending
Public contact package: address, general email, phone and office hours	[~] General email available; address and phone pending
Homepage updates: at least three news items, three future events and three carousel items	[~] Two local news/carousel records available; future events and media pending
Core destinations and owners: Membership, Contact, Council, Constitution, Awards and Jobs	[] Exact links, content owners and approval contacts needed now

First-draft acceptance point

The first draft is reviewable when every Priority 1 row is either supplied or explicitly approved to remain a labelled placeholder.

Priority 2 - complete the public content

These packages add depth after the first homepage and core routes can already be reviewed.

Priority 2 deliverable	Current status
Nuclear Horizons covers, accessible PDFs, archive links and web-distribution permission	[~] Issue metadata available; publication permission and assets pending
Featured research package with canonical references, approved figure and image permission	[~] One feature summary/authors/institutions available; references and media pending
Current leadership profiles, terms, portraits and approved Constitution/bylaws	[~] Leadership snapshot available; profiles, terms and governance files pending
Student resources, opportunities, owners, deadlines and review dates	[] Needed after first-draft review
Verified institutions spreadsheet for map and accessible list	[] Needed after first-draft review
Distinguished-scientist and member-highlight profiles with selection rules and consent	[] Needed after first-draft review

Priority 3 - production launch readiness

These decisions are required later for a safe public launch, but are not required for the first local draft.

Priority 3 deliverable	When needed
Final privacy, accessibility, terms, cookie and correction policies	Before production launch
Official social profiles, newsletter route and any approved analytics decision	Before production launch
Domain, DNS, Cloudflare production resources and Cloudflare Access identities	Deployment phase only
GitHub deployment permissions, production secrets and operational ownership	Deployment phase only
Final legal, security, retention, accessibility and launch-readiness review	Immediately before launch

Cloudflare, a domain and remote deployment remain intentionally outside the local-first content phase.

How to use the detailed checklist

Supply only approved, publishable material. Drafts are welcome for local review, but label them clearly as DRAFT. If an item is unavailable, write NOT AVAILABLE rather than leaving it ambiguous.

Bulletin review note: [x] identifies information supported by the two supplied Nuclear Horizons issues. It does not itself grant web-republication permission for protected text, images, PDFs or personal profiles.

For every submitted item

- ☐ Confirm the material is approved for public website use.
- ☐ Name the owner/contact person who can approve corrections.
- ☐ State whether the item has an expiry or review date.
- ☐ Provide image credits, copyright holder, licence/permission, and suggested alt text.
- ☐ Identify any material that must not be downloadable or reused.

The remaining pages provide the complete field-level reference. Missing facts will remain visibly marked as development placeholders.

1. Brand identity and global site content

Official identity

Please supply source-quality brand files, not screenshots.

- ☐ Primary INPA logo: SVG preferred; transparent PNG fallback at least 1200 px wide.
- ☐ Alternate logo versions: light/dark, monochrome, compact mark, if approved.
- ☐ Brand colour values in HEX/RGB/CMYK, if formally defined.
- ☐ Official typefaces and font licences, or confirmation that system/open fonts may be used.
- ☐ Brand usage guidance: clear space, minimum size, prohibited alterations.
- ☒ Official full name, accepted short name, and approved one-line descriptor/tagline.

Site-wide information

This material appears across navigation, footer, search metadata, and contact areas.

- ☐ Official postal address, general email, phone number, and office hours if published.
- ☐ Approved social-media profile URLs.
- ☒ Footer copyright wording and legal entity name.
- ☐ Official navigation labels and any mandatory priority order.
- ☐ Default website title and search-engine description (approximately 150-160 characters).
- ☐ Emergency, accessibility, grievance, or statutory links that must appear site-wide.

Editorial decisions

A short written answer is sufficient.

- ☐ Primary publishing language; whether additional languages are planned.
- ☐ Date/time format and official timezone for events.
- ☐ Whether older news/events remain searchable indefinitely.
- ☐ Who may approve, publish, correct, archive, and remove content.
- ☐ Preferred public contact channel for corrections and accessibility requests.

2. Homepage content - sections 1 to 7

Section 1 - Hero

The first screen should communicate INPA's identity without unsupported claims.

- ☐ Approved headline (recommended: 6-12 words).
- ☐ Approved supporting introduction (recommended: 25-50 words).
- ☐ Primary and secondary button labels with exact destination URLs/routes.
- ☐ Hero image/video; focal point or safe crop notes; photographer/source and permission.
- ☐ Descriptive alt text, or confirmation that purely decorative media should use empty alt text.

Section 2 - President's message

Provide the current office-holder's approved information.

- ☐ Full name, exact title/designation, approved portrait, and photo credit.
- ☒ Welcome message for homepage (recommended: 100-180 words).
- ☒ Longer message for a dedicated page, if required.
- ☐ Signature image, tenure dates, profile link, and review/expiry date, if published.

Section 3 - Latest news

Provide at least three items using the news template in Section 4.

- ☐ Approved title, summary, publication date, category, body, and featured image.
- ☐ Optional external/source link and downloadable attachments.

Section 4 - Upcoming events

Provide at least three items using the event template in Section 4.

- ☐ Title, summary, start/end date and time, timezone, venue or online details.
- ☐ Registration link, deadline, organiser/contact, event image, and accessibility notes.

Section 5 - About INPA

Short homepage copy can link to complete institutional material.

- ☐ Approved 80-150 word overview.
- ☐ Mission, vision, history, mandate/objectives, and key activities.
- ☒ Founding year and other institutional facts only with approved source wording.
- ☐ Council/leadership list and profiles; approved constitution/bylaws document.

Section 6 - Featured research

One strong, current research story is sufficient initially.

- ☒ Headline, 80-150 word plain-language summary, researchers and institutions.
- ☐ Relevant field/topic, publication or DOI link, approved image/figure and caption.
- ☐ Permission to reproduce the image and any required credit line.

Section 7 - Recurring science feature

Confirm the final public name and editorial cadence.

- ☐ Feature/series name, purpose, intended audience, and publishing frequency.
- ☐ First article: title, teaser, body, author/byline, references, and visual material.
- ☐ Editorial owner and approval route for future instalments.

3. Homepage content - sections 8 to 13

Section 8 - Nuclear Horizons

Supply the approved identity and first issue/package.

- [x] Official description, logo/wordmark, cover image, issue title/number/date.
- [] PDF or article links, editor/author credits, download permission, and archive list.
- [] Subscription/contact call to action, if applicable.

Section 9 - Students and early-career resources

List only opportunities that are current and maintained.

- [] Introductory text and audience definition.
- [] Scholarships, schools, internships, fellowships, training, and resource links.
- [] Eligibility, deadlines, application links, contact person, and review dates.

Section 10 - Institutions map

A spreadsheet is preferred for accuracy and later maintenance.

- [] Institution name, type/category, city, state/region, postal address, website.
- [] Latitude and longitude, or an address suitable for later verified geocoding.
- [] Short description, contact link, relevant facilities/topics, logo permission.
- [] Confirmation that every listed institution may be displayed publicly.

Section 11 - Distinguished scientists

Clarify selection rules before supplying profiles.

- [] Selection criteria and approval authority.
- [] For each scientist: full name, title, affiliation, 60-120 word approved biography.
- [] Portrait, credit/permission, fields of work, selected links, display order.

Section 12 - Member highlights

Avoid publishing personal information without consent.

- [] Selection criteria, consent confirmation, name, role, affiliation, location if approved.
- [] 80-150 word highlight, portrait, image credit, links, and display/review period.

Section 13 - Quick access and footer

Supply exact destinations and labels.

- [] Membership application/renewal, awards, jobs, events, publications, contact, council.
- [] Constitution/bylaws and other official documents in accessible PDF or HTML.
- [] Privacy notice, terms, accessibility statement, cookie policy if applicable.
- [] Newsletter/subscription destination, only if a real maintained service exists.

4. Repeatable content templates

Copy these fields into a document or spreadsheet. One row/document per item is ideal.

News item

- ☐ Title:
- ☐ URL slug (optional; otherwise generated):
- ☐ Short summary (30-60 words):
- ☐ Full body:
- ☐ Publication date/time and timezone:
- ☐ Category/tags:
- ☐ Author/source:
- ☐ Featured image filename, caption, alt text, and credit:
- ☐ Related/external link:
- ☐ Attachment filenames:
- ☐ Publish now, scheduled, or draft:

Event item

- ☐ Title:
- ☐ Short summary:
- ☐ Full description:
- ☐ Start date/time/timezone:
- ☐ End date/time/timezone:
- ☐ Venue name and full address, or online platform:
- ☐ Registration URL and deadline:
- ☐ Organiser and public contact:
- ☐ Event image filename, alt text, and credit:
- ☐ Cost/eligibility, if any:
- ☐ Accessibility information:
- ☐ Publish now, scheduled, or draft:

Homepage carousel item

- ☐ Headline (recommended: under 70 characters):
- ☐ Supporting text (recommended: under 160 characters):
- ☐ Image/video filename and crop/focal-point guidance:
- ☐ Alt text and credit:
- ☐ Button label and exact destination:
- ☐ Display start/end dates:
- ☐ Priority/order:

Person profile

- ☐ Full name and exact designation:
- ☐ Institution/affiliation:
- ☐ Approved biography:
- ☐ Portrait filename, alt text, photographer/source, and permission:
- ☐ Approved profile/publication links:

- [] Consent confirmed by:
- [] Review/expiry date:

5. Media delivery specifications

Please send the highest-quality original available. The website workflow can create responsive derivatives; already-compressed social-media downloads usually produce poor results.

Preferred formats

Asset	Preferred	Minimum guidance	Also provide
Logo	SVG	Transparent PNG fallback, 1200 px wide	Brand rules and colour variants
Hero image	JPG/WebP source	2400 x 1350 px; landscape	Focal point, alt text, credit
Portrait	JPG/PNG	1200 x 1500 px; uncluttered crop	Person name, credit, consent
News/event image	JPG/PNG	1600 x 900 px	Caption, alt text, credit
Document	Accessible PDF + source	Selectable text; tagged if possible	Title, owner, publication date
Video	MP4 H.264	1080p; short homepage clips	Poster image, captions, transcript
Audio	MP3/AAC	Clear speech/music quality	Transcript and rights details

Rights and accessibility metadata

Every media file must be accompanied by:

- [] Plain-language description/alt text explaining meaningful visual content.
- [] Creator/photographer, copyright holder, required credit line, and source URL if relevant.
- [] Written confirmation of permission/licence for public web use.
- [] Names of identifiable people and confirmation that consent requirements are satisfied.
- [] For video: captions plus a transcript; for audio: a transcript.
- [] For diagrams/charts: source data or a text explanation of the conclusion.

6. File organisation and delivery

A single ZIP folder is easiest for the initial local-content handoff. Keep filenames descriptive and stable.

Suggested folder structure

01-brand/
02-hero/
03-president/
04-news/
05-events/
06-about-and-governance/
07-research/
08-nuclear-horizons/
09-students/
10-institutions-map/
11-scientists/
12-member-highlights/
13-quick-links-and-legal/

Naming rules

Use ASCII letters, numbers, and hyphens where practical.

- [] Examples: inpa-logo-primary.svg, president-full-name-portrait.jpg.
- [] News: 2026-08-15-short-news-title.jpg and matching .docx/.txt content file.
- [] Events: 2026-09-20-event-short-name.jpg and matching details file.
- [] Avoid final-final-v2 style names; include a date or revision number instead.

Recommended tracking spreadsheet columns

This makes review and import considerably safer.

- [] Content ID, section, title/name, status, filename, destination URL.
- [] Owner, approver, approval date, publication date, expiry/review date.
- [] Alt text, caption, credit, copyright holder, permission/licence.
- [] Notes/corrections required.

Do not include private member databases, identity documents, passwords, access tokens, payment information, or unpublished personal contact details in the content package.

7. What is not required for local completion

The local website can be completed and reviewed without any external account or purchase.

- ☐ No Cloudflare account or Cloudflare Access configuration yet.
- ☐ No domain purchase or DNS changes.
- ☐ No GitHub repository deployment or CI/CD secrets.
- ☐ No remote D1 database or R2 storage bucket.
- ☐ No production email, analytics, newsletter, payment, or other paid service.

Needed later for production launch

- ☐ Cloudflare account and project ownership decision.
- ☐ Domain name and DNS control.
- ☐ Production D1 database, R2 bucket, Workers deployment, and secrets.
- ☐ Cloudflare Access policy and authorised editor identities.
- ☐ GitHub repository/organisation and deployment permissions, if GitHub deployment is chosen.
- ☐ Final privacy, security, retention, analytics, cookie, and operational decisions.

Submission summary

Begin with the Priority 1 roadmap on page 2. The remaining content can arrive section by section. Each approved package will replace a clearly labelled development placeholder in the local website. No unsupported institutional facts will be added.

Content package prepared by: _____

Approval contact: _____

Submission date: _____ Revision: _____
